

# THE CHALLENGE

Every day, thousands of Londoners and visitors to the city cross the Thames. It's one of the most iconic rivers in the world.

Imagine how much better their experience of London will be with a cleaner river running through its heart.

**Did you know?...** A clean environment is known to improve health, well-being and quality of life.

What vision do you think today's architects and planners will have for facilities along the Thames once the river is cleaned up?

What facilities might Londoners and visitors like to experience along the river when the Tunnel is completed in 2022?

## Time to take action

Your challenge is to design an exciting river-based facility that will enable everyone to enjoy the benefits of a green (and blue!) space.

Think about the activities people might enjoy doing on the banks of the River Thames - from sport and leisure to education and culture.

Imagine that you will pitch your proposal to The Mayor of London, who is responsible for making London a better place for everyone visits, lives or works in London.

### Present your ideas in a visual and creative way:

You could do a poster board, powerpoint, formal report or even a brochure - the choice is yours!

## GET TO WORK WITH A REAL INDUSTRY PROFESSIONAL

By now you will be brimming with brilliant ideas and you've probably got loads of questions on how to develop them.

Ask your teacher or group leader to put you in touch with your Tideway ambassador.

They can help you get to grips with the exciting world of design, engineering and construction.
